## III. TOKENOMICS

The GMFAM coin (Ticker: **GMF**) will be an ERC20 token based on the Ethereum blockchain, ensuring security and interoperability.

The total supply of GMF will be determined at launch, and a portion of it will be set aside for airdrops and rewards for community participation, fostering a sense of ownership and loyalty among users.

A percentage of every transaction will be redistributed among all \$GMF holders, providing an incentive to hold the coins and support the stability of the project. With its innovative, strong utility and fully decentralized approach, \$GMF holds massive potential to be the next great meme coin after \$DOGE, \$PEPE, \$TURBO and so on.

## **IV. SECURITY**

GMFAM's smart contracts will undergo rigorous audits by reputable third-party firms to ensure the safety and security of users' funds. Transparency is one of our core principles; all audit results will be publicly accessible.

## V. COMMUNITY

GMFAM's main strength lies in its community. We believe that the collective power of our community will be the driving force behind GMFAM's success. Our platform will focus on fostering this sense of community, optimism and shared success.
